# Show Us a Better Way

---

Tell us what you'd build with public information and we could help fund your idea!

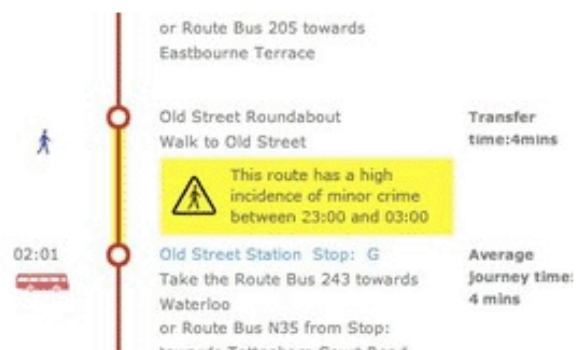

---

## What would you create with public information?

Ever been frustrated that you can't find out something that ought to be easy to find? Ever been baffled by league tables or 'performance indicators'? Do you think that better use of public information could improve health, education, justice or society at large?

The UK Government wants to hear your ideas for new products that could improve the way public information is communicated. The [Power of Information Taskforce](#) is running a competition on the Government's behalf, and we have a **£20,000 prize fund to develop the best ideas to the next level**. You can see the type of thing we are looking for [here](#).

To show they are serious, the Government is making available [gigabytes](#) of [new](#) or [previously invisible](#) public information especially for people to use in this
