A bill to establish a Colorado all-payer health claims database (HB 10-1330) was introduced in the 2010 legislative session. The bill, which had passed the House and been introduced in the Senate as of March 15, 2010, creates an advisory committee to make recommendations regarding creation of the framework and implementation plan for a Colorado all-payer health claims database. The database's purpose is “… to facilitate the reporting of health care and quality data that results in transparent and public reporting of safety, quality, cost, and efficiency information at all levels of care.” If sufficient funding is received through gifts, grants and donations, the all-payer claims database must be operational by Jan. 1, 2013.
