NCSL Task Force on Energy Supply
Zoom Meeting
October 7, 2020 | 2 pm ET/1 pm CT/Noon MT/11 am PT/ 8 am HT

Welcome
- Kristy Hartman and Glen Andersen, NCSL
- Senator Eric Koch (IN), Co-Chair

Updates for the Energy Supply Task Force
- NCSL will provide an overview of upcoming webinars, new resources and other events of interest to the Task Force.

Planning for Resilience on the Distribution Grid
- As distribution grid resources expand their role in balancing the grid, it is critical that planners maximize the distribution grid’s ability to withstand electric reliability and resilience challenges, whether caused by extreme weather events or cyber and physical threats. Planning must ensure that the rising amount of distributed generation resources, such as rooftop solar and energy storage, can be integrated in a way that improves reliability and resilience. This discussion will explore these issues and investigate the role of state policy in creating a resilient distribution grid.
  - Paul De Martini, Managing Partner, Newport Consulting

Legislative Actions and Policy Trends: Energy Resilience
- NCSL’s Dan Shea will explore recent actions on this topic, highlighting NCSL resources to support policymakers in their efforts to address energy resilience issues in their states.

Q&A
- This is an opportunity to ask questions of today’s speakers and to allow for an open discussion among Task Force members and partners.
  - [For Task Force members] What energy resilience topics have arisen in your state or legislative committee? What support on this topic would be most helpful to you?

Wrap Up

Mark Your Calendars for the Next Task Force Meeting on Dec. 2, at 2 pm ET!

Energy Security and Resiliency Resources
- Cybersecurity and the Electric Grid | The state role in protecting critical infrastructure, NCSL 2020
- Responding to Disasters: Clearing the Way for Utilities, NCSL 2020
- Advancing Electric System Resilience with Distributed Energy Resources, NARUC 2020
