## Evidence-based means...

THE  
**PEW**  
CHARITABLE TRUSTS

MacArthur  
Foundation

**Programs or practices whose level of effectiveness has been determined by rigorous evaluations.**

- Evidence-based programs can be ineffective or even have a negative impact.
- Where is the evidence?
  - Jurisdiction-specific evaluation
  - Clearinghouses

# What are clearinghouses?

THE  
**PEW**  
CHARITABLE TRUSTS

MacArthur  
Foundation

- Identify “what works”
- Review and summarize rigorous evaluations of different programs and practices
- Assign ratings to programs and practices based on the evidence (e.g., model, promising, mixed effects)
- Use slightly different methodologies, criteria, and terminology
- Policy area specific
  - What Works Clearinghouse = Education
  - CrimeSolutions.gov = Criminal & Juvenile Justice

# Results First Clearinghouse Database

THE  
**PEW**  
CHARITABLE TRUSTS

MacArthur  
Foundation

- Contains information from 9 clearinghouses
- Features over 2,500 programs and practices
- Allows users to search and filter by categories and settings
- Provides brief description, key details, and rating from clearinghouse
  - Links to program page
- Applies Results First rating color

### Legend

- Highest rated**  
The program had a positive impact based on the most rigorous evidence.
- Second-highest rated**  
The program had a positive impact based on high-quality evidence.
- Mixed effects**  
The program had inconsistent impacts based on high-quality evidence. That is, study findings showed a mix of positive impact, no impact, and/or negative impact.
- No effects**  
The program had no impact based on high-quality evidence. That is, there was no difference in

The Pew-MacArthur Results First Initiative created the Results First Clearinghouse Database to provide users with an easy way to access and understand the evidence base for programs in social policy areas such as behavioral health, criminal justice, education, and public health. More specifically, it allows users to see if there have been rigorous evaluations of a program and, if so, to review information on the program's effectiveness.

The database compiles and displays key information from nine national clearinghouses, including the rating they assigned to each program and the program's description, outcomes, setting, and target population (where available). It also contains a link back to the program's original source page on the clearinghouse website so that users can obtain additional details.

Clearinghouses develop this information by reviewing and summarizing rigorous evaluations of programs within their focus area. Then, they assign a rating to each program using their own methodology and terminology (such as top tier, effective, positive, and model).

The database applies color-coding to the clearinghouses' distinct rating systems, creating a common language that allows users to quickly see where each program falls on a spectrum from negative impact to positive impact. This coding consists of five rating colors that correspond to different levels of impact as shown below.

← **Negative impact** **Positive impact** →

Negative effects    No effects    Mixed effects    Second-highest rated    Highest rated

### Wellness Recovery Action Plan (WRAP)

Clearinghouse: ●

Wellness Recovery Action Plan (WRAP) is a manualized group intervention for adults with mental illness. WRAP guides participants through the process of identifying and understanding their personal wellness resources ("wellness tools") and then helps them develop an individualized plan to use these resources on a daily basis to manage their mental illness. [Newly Reviewed Programs \(6\)](#) [Legacy Programs \(7\)](#)

Results are listed in two groups: Newly reviewed programs and Legacy programs. Legacy programs refer to the 356 programs that were on the NREPP website as of September 2015. The program profiles of each are displayed in different formats.

**Newly Reviewed Programs**

This section lists programs that were reviewed under the new review criteria that took effect after September 2015.
