

**ETS**<sup>®</sup>  
**Professional  
Educator**  
PROGRAMS

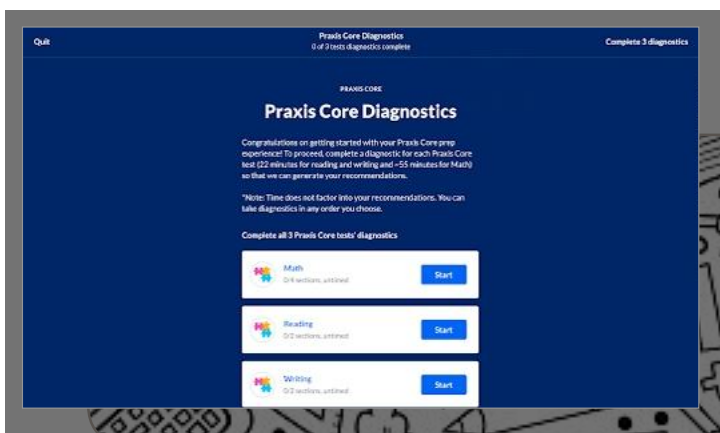

1

Teacher candidates can begin their experience by setting up a free account at [khanacademy.org](https://www.khanacademy.org).

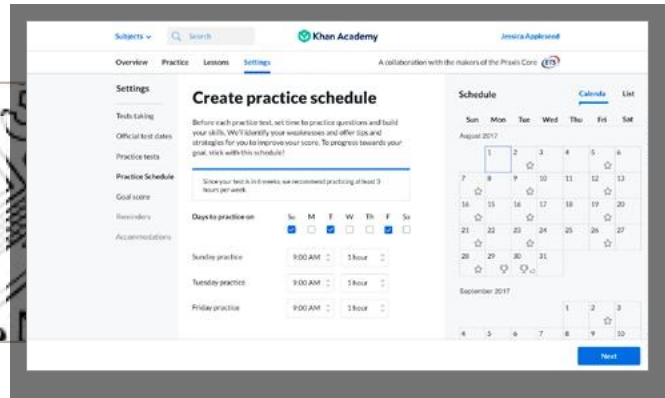

2

Candidates will then be prompted to take diagnostic tests for reading, writing and math. These tests enable Khan Academy to recommend a personalized study plan that helps candidates reach their score goals.

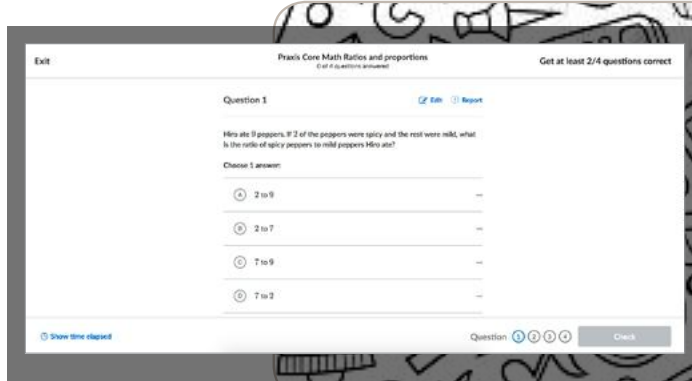

3

Once the diagnostic tests are complete, candidates are prompted to create a customized practice schedule, which includes full-length practice tests and interactive sample questions.

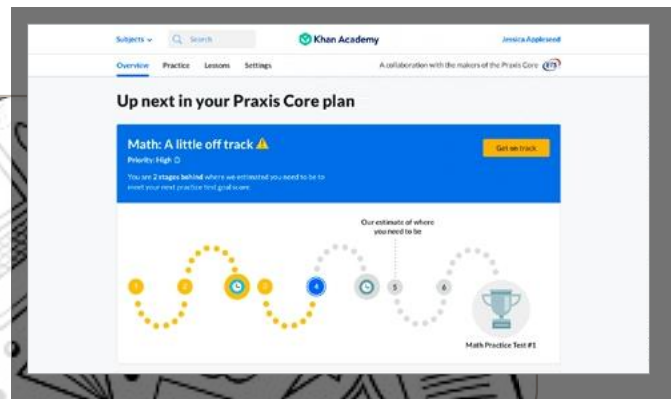

4

Candidates practice their skills in reading, writing and math based on Khan Academy's recommendations and will receive immediate feedback on the practice problems when they click on the "Check" button. Additionally, if they get a problem wrong, they can choose to see the answer explanation and related examples.

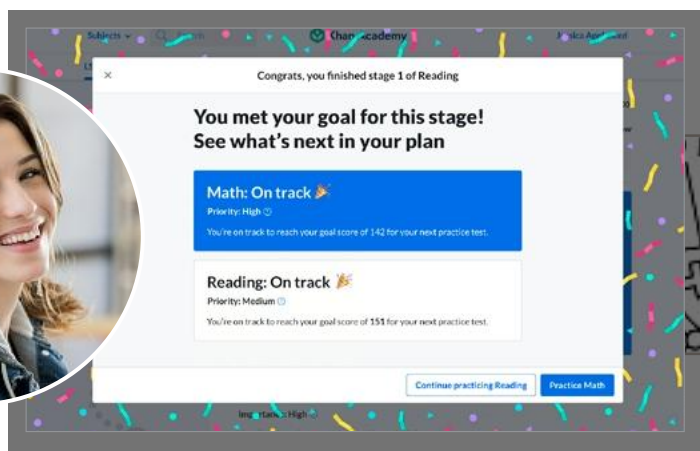

5

As candidates move through their personalized practice, Khan Academy will dynamically let them know how they are tracking toward their score goals for each subject. This allows candidates to track their progress in a motivating and encouraging way.

6

Finally, the candidates will be able to celebrate their successes and build their confidence for test day!

Together, ETS and Khan Academy hope to:

- Widen the path into preparation programs for all students interested in teaching and help to diversify the teacher pipeline
- Reduce the need for test remediation and test repetition by providing preparatory instruction
- Maximize the success of those who enter preparation programs

Khan Academy Official *Praxis* Core Prep • Launching July 2019 at [khanacademy.org/praxis-core](https://khanacademy.org/praxis-core)

#### About Khan Academy

Khan Academy is a 501(c)(3) nonprofit organization with the mission of providing a free, world-class education for anyone, anywhere. Khan Academy's free resources include practice questions, quizzes, videos and articles. They offer preschool through early college learning on a range of academic subjects, including math, sciences and the humanities. They have been translated into 36 languages and 18 million people learn on Khan Academy every month. [www.khanacademy.org](https://www.khanacademy.org)

#### About ETS

ETS draws upon its seven decades of expertise as a nonprofit educational assessment and research organization to pioneer innovative ways for people to show what they know and can do. The belief in the life-changing power of learning is at the root of everything they do — it's behind the tools they develop for teachers, the research that inspires educational progress and the commitment ETS makes to enable opportunity for learners around the world.
