The Client & Agile

Product Owner

By Proxy

What did This buy Us

- Product Owner would be involved with iteration planning.
- Provided feed back on the application design.
- Reviewed acceptance criteria on user stories.
- Performed acceptance testing of stories to ensure business requirements were met.
- Didn't need the client available all the time to answer developer questions.

What if we Didn't Know?

- Started with the 80/20 Rule.
- Had a few go to offices for random questions.
- Look are our databases to pull matrix to determine need.
- Choose the happy path!
- Crossed our fingers and waiting for any the fallout.
