Inception of OnTrack Web

- Bill Analysis Section wanted a business process change – we had the time
- Went from a desktop app to web
- Wanted a dashboard approach to conducting daily work
- Legacy almost had too much for certain processes
- Wanted a paperless approach to conducting business

Document Types in OnTrack Web

- Bill Analyses – Research Bill Analysis Section
- Certificates – Research Resolutions Section
- Member Resolutions – Research Resolutions Section
- Working to get more document types in for both in the near future

Benefits of going to web

- BA section able to go 100% paperless – cost saving measure
- Reduced staffing during session due to increased efficiencies
- Comp time and weekend work reduced significantly – reduced budget expenditures
- BA section is able to do their work from start to finish at home if needed

Benefits of going to web cont...

- Can easily navigate to information that is time sensitive – no need to find the physical folder
- Inefficiencies reduced and more time spent on “human” requirements
- Workload management – more efficient and transparent
 - all is right there to see
 - managers can easily see where work is, with who, and for how long
- For the resolutions section, the start of the process to delivery cut down by about a week

Some technologies used

- Built in Angular JS
- ASPOSE
- Active Reports
- AG Grid
