To Whom It May Concern:

On behalf of attendees at the 2005 National Association of Legislative Information Technology (NALIT) Professional Development Seminar, please accept our enclosed donation of \$235 to the Louisiana Disaster Recovery Foundation.

NALIT is an association of legislative information systems staff affiliated with the National Conference of State Legislatures. NALIT serves to provide a network for information exchange, to improve communications between legislative information systems staff and the legislators they serve, and to enhance the professionalism of the members of the association. Information systems managers and staff play a key role as legislatures increasingly use technology to provide access to legislative information, to streamline the legislative process, and to improve the legislative system overall.

Attendees representing legislatures in approximately 35 different states made individual contributions to show our support for those affected by the recent hurricanes.

Sincerely,

Pam Greenberg  
NCSL Liaison to NALIT
