

UTAH'S STEPS

2011

STEPS TAKEN

- **SAN installed to facilitate VMware**

STEPS IN PROGRESS

- Convert WordPerfect bill drafting format to XML. Create drafting XML editor tool.
- Create voting system in house with automated Tweets
- Redistricting. Used software from ASRI to publish maps to .kmz which can be used by Google Maps.
- Also for redistricting, electronic portion of bill in the form of a DVD that contains maps and block assignments that goes with the bill.

STEPS IN THE FUTURE

- Streaming formats for committee meetings will be published in many formats instead of just RealPlayer. This will allow it to be used across multiple platforms.
- RFP in process to look at options for a new email system. Looking at using a hosted solution instead of the current on-site solution.
- Looking into bringing BES, Good servers in house.
- In the past we used BlackBerries exclusively. This year we have introduced Androids. We will be continuing to expand our support and will be supporting Windows 7, iPhones, etc. in the future.
