Time Frame	Three Months	Two Years	Three Years
Cost	\$30,000	\$560,000	\$7,700,000

Challenges – Legal and Policy Issues – These Are Universal

Payment – Technology advances when there is a need and a business case. Legislate reimbursement telehealth at the same rate as face to face in as many places as possible.

Medicine is a highly regulated industry – Licensure and Credentialing are expensive and time consuming. Streamline licenses for telehealth and legislate statewide credentialing.

The technology needs to work everywhere in your state. Fund the building of infrastructure and legislate statewide interoperability.
