

1 COMMITTEE: Environment  
2 POLICY: New Source Review Program (*Joint with the Agriculture*  
3 *and Energy Committee*)  
4 TYPE OF POLICY: Existing

5

6 The National Conference of State Legislatures (NCSL) urges the Environmental Protection  
7 Agency (EPA) to reform the NSR program to achieve improvements that enhance the  
8 environment and increase production capacity, while encouraging efficiency, fuel diversity  
9 and the use of resources without weakening the requirements intended to reduce emissions  
10 from new or modified sources of air pollution. Routine maintenance, repair or replacement  
11 activities which are not major modifications should not trigger NSR requirements.
