

# Cybersecurity & Infrastructure Security Agency (CISA)

## The Nation's Risk Advisors

---

### VISION

A secure and resilient critical infrastructure for the American people.

---

---

### MISSION

Lead the National effort to understand and manage cyber and physical risk to our critical infrastructure.

---

## CORE COMPETENCIES

# Our Perspective

Our goal is to foster resilience across the system, increasing capacity and ability of critical infrastructure to secure their assets. This is what we know works.

### Information-sharing

Rapidly identifying cyber and insider threats and techniques, and sharing among a broader community

### Capacity-Building

Increasing the strength of your organization's security program and building resilience in the overall ecosystem

### Risk Assessments

Understanding the threat to you and your systems and assets; identifying gaps in your security program; and understanding tools available to meet your needs

### Public and Stakeholder Engagement

Highlighting a threat or known risk to the general public and stakeholders; understanding evolving and changing needs; and educating on potential responses and resources available

# What You Need to Do

Leverage and optimize  
Business Processes

Understand the Strategic Threat

Identify Your 'High Value Assets'

Gain Visibility

Assess Your Vulnerabilities

Identify Your Team

Know the Resources Available to You

# How We Can Work Together

- ✓ Exchange information and intelligence
- ✓ Understand the strategic threat
- ✓ Identify your assets and risks
- ✓ Analyze your relationships
- ✓ Know your people and their access

## Know the Threat

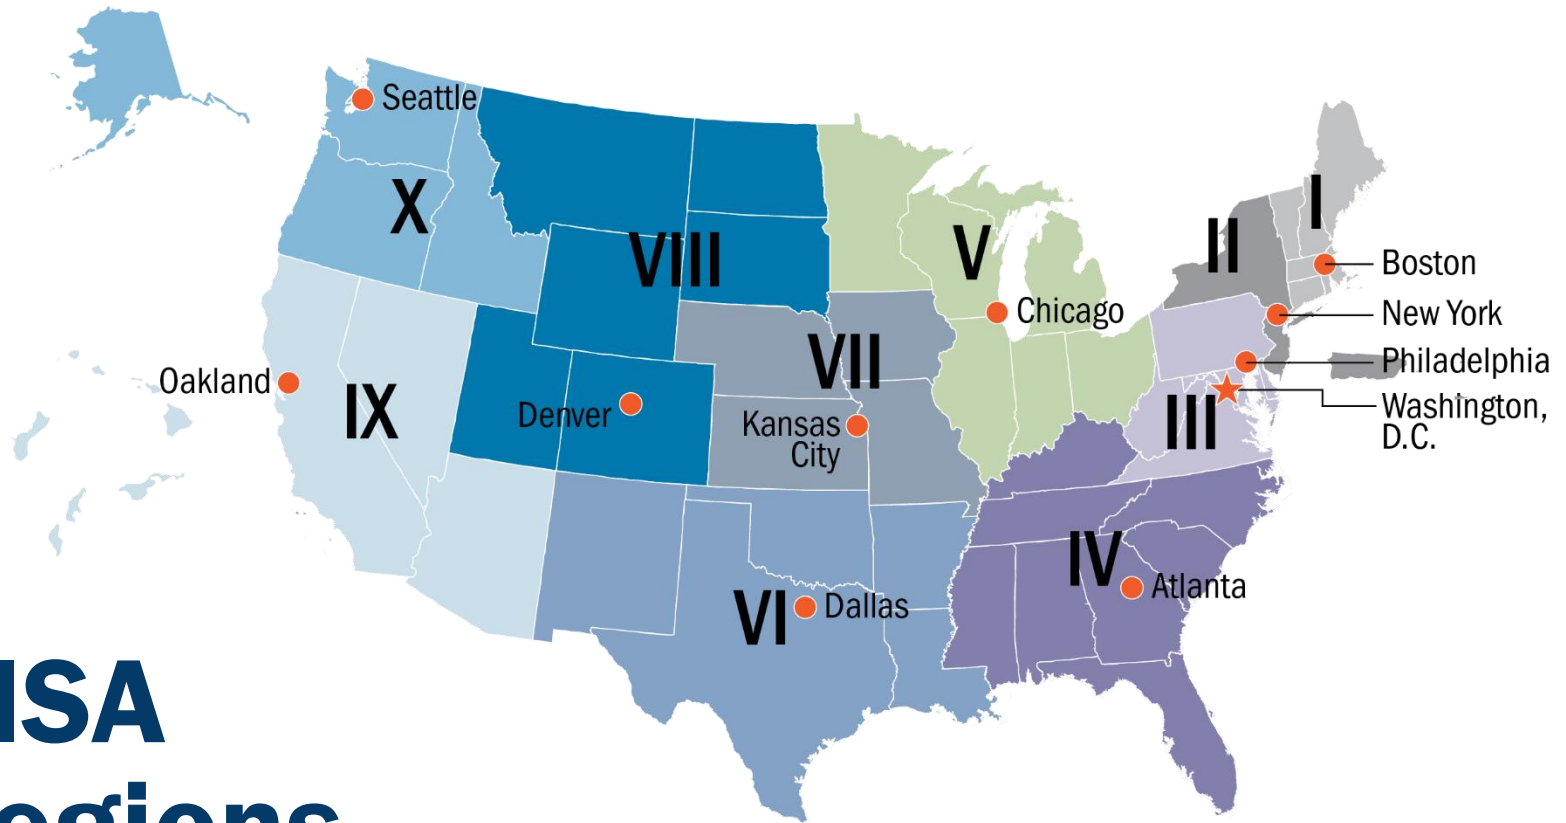

Know where you fit in the context of our adversaries' strategic goals and objectives. Know their capabilities and their tactics, techniques, and procedures.

## Know Yourself

Understand what your high-value assets are. Assess your security programs and their ability to mitigate this risk.
