

HEALTH INNOVATIONS STATE LAW DATABASE 2015

Tracking State Laws for Health Care Transformations

7/21/2015

NCSL's Health Program seeks to help state legislators and their staff learn about promising health system reforms and policy innovations that promote a more efficient and effective health care system and improve Americans' health.

The health care system is undergoing a critical transformation in both financing and service delivery. The reforms and changes aim to improve the efficiency and effectiveness of health organizations and services, reduce costs and improve people's health. State and federal governments play important roles in promoting this transformation.

This database of recently enacted laws includes information on state health transformation initiatives and related changes in state statutes, as well as a description of topics and categories of legislation for 2015.

- **So far, NCSL has identified 274 newly enacted laws and resolutions in 42 states and D.C. (as of July 21, 2015).**

At the bottom section of the page, below the search term check-offs, you will find additional information on what legislatures are doing related to health innovations and a list of helpful search keywords.

For faster performance, please use the fields below to filter your results. If nothing is picked, the default search is to include all topics and states in current session year.
